The Gloucester County Amateur Radio Club Meets the first Wednesday, of each month at the VFW Hall in Woodbury, N.J. Meetings begin promptly at 8:00 P.M.

Please send contributions for CROSSTALK to: Tony Starr, WA2FZB,

Deadline for submissions is ten (10) days before club meetings.

PRESIDENT'S MESSAGE - SEPTEMBER 1985

I would like to thank everyone who worked hard to help make our 1985 Hamfest a success. Ginny, N2FJM, and all of the various committee chairmen did a fine job of leading the way for all of the club members who came out to lend a hand. It is always good to see all you people working together.

Another success we had recently was our club picnic. Joe, WA2GFK, made sure that everyone had a good time and there was a lot of good food, beer, and soda. It turned out that the picnic cost the club a bit more than we thought it would, but it was worth it. It was our treat to all of you members who worked hard not only at the Hamfest, but during the months of planning and preparation that we spent before the Hamfest actually took place. I would like to see another picnic next year. I think that the members who participate in club events like the Hamfest deserve it.

Since so many of you are back from your vacations now, I think we will have a good turn out for our meeting on September 4th. See you there !

President Tom Gordon, KB2GI

SEPTEMBER PROGRAM

Program chairman Chic, WA2USI, reports that this month's program will be another fine film from the ARRL's library. The title of this film was not known, pending availability, at the time of this writing. Come out to the meeting to find out which film it is. Even if it's one you've seen before, your attendance is still important to the GCARC.

HAMFEST 1985

The Hamfest is now history. Many brave GCARC members came out to battle the persistent rain and make the Hamfest a success. No figures are yet available, but able chairperson Ginny Martin, N2FJM, promises to deliver a full report in time for next month's Crosstalk. In the meantime, the club thanks all who came out to help. Stay tuned for a more informative report next month. Some early information may be available at this month's meeting, so be sure to attend!

CLUB BANQUET

Roslyn Marder, N2AKL, informs us that the club banquet will be held this year at O'Henry's Restaurant (Route 47, north of Pitman) on October 26. Complete information will be published in next month's issue. Any questions, see Ros at the meeting.

GCARC RECEIVES INVITATION FROM WPVI

Members of GCARC have been invited to attend the taping of Larry Ferrari's TV show as a studio audience. Larry, WA2MKI, is one of the more well known hams in the Philadelphia area. Four taping dates are available and one must be chosen at the September meeting if we are to attend. The dates are September 16, 30 and October 14, 18. Taping starts at 8 PM and lasts two hours. Those attending should arrive at WPVI studios no later than 7 PM.

Larry needs at least 12 people and two weeks notice from the group. You may bring a camera or tape recorder (audio) and, of course, spouses are cordially welcome. Anyone interested? Bring it on to the floor at the meeting.

TNX to Ed, WA2PFC

CROSSTALK GOES HIGH-TECH

By an overwhelming majority vote, the members present at the last general membership meeting approved the purchase of a TRS-80 Model IV computer system. The computer will be used for the editing, layout, and mastering of this newsletter. It will allow us maximum use of space while insuring that we do not exceed one ounce of First Class postage. There are other possible uses and features planned for the near future. Look for Crosstalk's "new look" next month. We of the staff are always looking for ways to improve our official publication.

MANY THANKS TO PINKY WILSON

When the computerized Crosstalk goes on line, we will no longer need the services of a typist. I would like to take this opportunity to thank Pinky Wilson, our typist, for her reliable service. Pinky has always done a good job, often doing part of the layout work, and was on the job before this editor even considered getting involved with Crosstalk. Former Editor Doug, WA2NPD, also spoke highly of Pinky. We recognize and appreciate Pinky Wilson's contribution to the GCARC.

LES BELLES

Our HAMFEST '85 is now history and I wish to take this opportunity to thank one and all for your contribution.

- N2FJM GINNY MARTIN, Chairperson of our big day, did a very fine job and without her leadership we may not have had a hamfest this year. Congratulations Ginny on a very fine job completed. We are all proud of you.
- K1YL/4 Ellen White, Editor of "How's DX" in QST came up from Florida just to tell us 'How's DX' as well as helped to cover the ARRL Booth.
- WB2MBW Jeannine Duane, semi-finalist for the recent space shuttle trip, gave us a real inside story of just how it all came about and her video tape was very interesting.
- N2AKL Roslyn Marder, our usual hard working gal behind the food counter, did a great job again in seeing that no one went hungry. A big hand to this real hard worker.
- N2FNF Irma Colabrese, although fairly new around club activities, I believe we can now identify her as one who is well experienced at our annual hamfest after working at the food counter. Great job, Irma.
- AE2Y Mary Petruzzi, came all the way from the Villas just to help out at the YL Table. Thanks Mary. I know you were able to see many of your friends.
- W2AFZ Della Parker, our Club Historian, was so busy answering questions I believe the day went quickly and she did meet many long time friends.

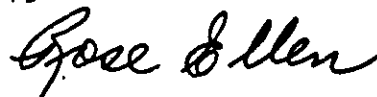

A big thank you to all the hard working, and understanding XYL's who came out for the day. Did I miss anyone? We try to recognize everyone who turned out to make the day a success.

XYL of WA2VEE-Doris was at the YL Table; XYL of K2JF-Gladys did some taxi service as well as help at the Food Table; XYL of KA2DSV-Donna helped at the Food Table; XYL of KD2CR, Miriam handled all the money at our Club Table.

Perhaps having an XYL as Chairperson brought out many of the other YL-XYL workers, who knows.

N2RE, yours truly enjoyed seeing the delight on the faces of those winners of the YL prizes as they took part in the YL Activities.

73

The Foundation For Amateur Radio

Washington, DC

NEWS

RELEASE

AUGUST 15, 1985
FOR IMMEDIATE RELEASE

The FOUNDATION FOR AMATEUR RADIO is pleased to announce the 1985 winners of the nineteen (19) scholarships which it administers.

- John W. Gore Memorial Scholarship - \$900
James H. Baker, KI4YN - Alexandria, VA
- Richard G. Chichester Memorial Scholarship - \$900
Eugene S. Reilly, KA8JIG - Cincinnati, OH
- Edwin S. Van Deusen Memorial Scholarship - \$350
Richard K. Soper, KA2IKV - Syracuse, NY
- QCWA Memorial Scholarships - \$600 each
Francis P. Horan, KA3CJR - Drexel Hill, PA
Hai T. Nguyen, KA0ALZ - Colorado Springs, CO
Carl H. Puckett, KA7BWC - Great Falls, MT
John E. Schnupp, N3CNL - Ephrata, PA
David J. Schmocker, KJ9I - Oconomowoc, WI
John G. Sullivan, N2DYC - Haddonfield, NJ
- QCWA Robert S. Cresap Memorial Scholarship - \$500
Douglas Swiatlowski, KA2KMT - Camillus, NY
- Radio Club of America Scholarship - \$500
James W. Healy, NJ2L - West Hurley, NY
- Edmund B. Redington Memorial Scholarship - \$500
David Swiatlowski, KA2KLM, Camillus, NY
- Young Ladies' Radio League Scholarship - \$500
Diane E. Willemin, N8CAY - Elyria, OH
- Amateur Radio News Service Scholarship - \$500
Michael Krensavage, KA3CUP - Marietta, GA
- Columbia (MD) Amateur Radio Association Scholarship - \$650
Christine L. Gray, KA3NAK - Elkton, MD
- Baltimore (MD) Amateur Radio Club Scholarship - \$500
Eric J. Smith, KA3KJO - Silver Spring, MD

(over)

Dade Radio Club Tropical Hamboree Scholarships - \$500 each
Christopher A. Atkins, KA2QWC - Fort Pierce, FL
David R. German, N4FAD - Sarasota, FL

Lewis W. Wilkinson Memorial Scholarship -\$500
Wayne F. Poole, KC4XL - Surfside, FL

These scholarships were open to all Radio Amateurs meeting the qualifications and residence requirements of the various sponsors. The FOUNDATION is a non-profit organization representing fifty clubs in Maryland, the District of Columbia and Northern Virginia. It is devoted exclusively to the scientific, literary and educational pursuits that advance the purposes of the Amateur Radio Service.

Announcement of the 1986 awards will appear in the April or May issues of the major amateur radio publications. Additional information regarding the FOUNDATION'S Scholarship program can be obtained from FAR Scholarships, 6903 Rhode Island Avenue, College Park, MD 20740.

37th ANNUAL SJRA HAMFEST

For those of you who didn't find that rare piece of equipment at our Hamfest, keep this date open. On September 15, 1985, South Jersey Radio Association will be holding their Hamfest at the Pennsauken High School, located just off Hylton Road (near Rt. 73), in Pennsauken, NJ. The Hamfest will be held rain or shine (like ours) from 8:00 AM to 4:00 PM. VEC Testing will be held. Tickets are \$2.50 in advance, \$3.00 at the door. Tailgating is \$5.00 per space, and tailgaters must purchase an admissions ticket. Talk in will be on K2AA repeater 145.20/144.69 MHz.

For Advance ticket sales send check or money order to:

Fred Holler, W2EKB
SJRA Hamfest Chairman
Cherry Hill, NJ 08034

or, call Fred

LOCAL DIAL-UP BBS's

I know for a fact that there are some of you out in ham radio land who own 300 or 1200 band telephone modems (Yea, how else can we loose the Amateur Radio SIG on Compuserve).

However, you say the \$500 a month user bills are keeping you from buying that new rig? Fear not, there are many BBS's available to us in the 609 area code, and these systems are almost free (Ma Bell always gets hers).

There are many types of information on the many systems in this area, from assistance with a machine specific software trouble to playing adventure game in realtime. The following list is what I have compiled from browsing a few systems, but I have not called them all. The list has comments from the ones I have called, but some of them may no longer be active. Also, there's a lot of public domain software out there to download. Have fun!

CELLULAR SILENCE

As expected, Senate Bill 1431, a proposed law that would make illegal the manufacture, sale or possession of receivers capable of receiving 800 MHz cellular telephone calls, passed the California Senate on June 26. The measure was opposed by Senator Walter Stiern of Bakersfield, who had discussed it with a number of amateurs in his district.

The bill now goes to the Assembly, where it is expected to be assigned to the Public Safety Committee, headed by Larry Stirling of San Diego. If it makes it out of committee intact, we expect it to be fought by Assemblyman Richard Katz of the San Fernando Valley.

Joe Merdler, N6AHU, still plans to meet with Herschel Rosenthal, the sponsor of this legislation, if he can get one of the scanner manufacturers to provide a receiver for a demonstration to Senator Rosenthal.

Merdler says that he is getting very little help in his attempt to block passage of this damaging legislation -- even from the manufacturers. Only S.C.A.N., funded by Uniden-Bearcat, has shown any real interest in fighting this bill. Regency and J.I.L. manufacture receivers for this new band.

N6AHU told Westlink that the real problem is that no one seems to be watching the government. SB-1431 was introduced way back in March, and no opposition was registered during public hearings, so the matter was reported out of committee as "non - controversial" legislation.

Merdler, who characterizes Rosenthal as "misguided," reports that the real forces behind this proposal were AT&T, Pac-Tel and ACLU. He says that our best hope of defeating the bill is by showing members of the Assembly how foolish California will look when the measure is taken to federal court.

BROADCASTERS LIKE HAMS

The May, 1985 issue of Television Broadcast Communications Magazine carried some high praise for the ability of radio amateurs to solve engineering problems in the broadcast industry. In his "Tech - Talk" article, writer Don Wilkinson dealt with remote news and production crews and their abilities to handle unforeseen emergencies. He noted that the experience of hams in successfully dealing with transmitter and antenna problems "shows up repeatedly." Detailed was one instance where the feedhorn for an electronic news gathering (ENG) microwave transmitter was lost, with only minutes to a live remote broadcast. Steve Flyte (K7SF), who was the remote engineer, successfully fashioned a replacement from a length of coaxial cable! The live shot made it on the air, and with almost normal signal strength. Wilkinson, Chief Engineer of KTAU-TV in Portland, Oregon, concluded by writing: "When I find a job applicant is 'turned on' about electronics enough to make it his hobby as well as his profession, I always take a second look. A ham radio callsign indicates to me that this individual has an extra depth of experience that can save the day in a pinch."

TNX to "the Westlink Report"
and K3WIL.

CRIMINAL COMPLAINTS FILED AGAINST JAMMERS

The FCC announced on July 3, 1985, that criminal complaints had been filed against three individuals accused of making illegal Amateur Radio transmissions. These complaints resulted in the arrest of Glenn L. Barrick of Detroit, Richard Szabo of Farmington Hills and Robert J. King of Redford Township. Pending the filing of formal charges against the individuals involved, the criminal complaints have now been dismissed by the U.S. Attorney for the Eastern Division of Michigan.

Dismissal of the criminal complaints now allows the cases to be processed in a more routine manner. Upon complete review of the case information, the results may be presented to a federal grand jury to seek indictments for violation of Federal law. Conviction could result in a possible maximum sentence of one year in prison and a \$10,000 fine for each offense.

The FCC's Detroit District Office conducted the investigation and located numerous complaints about deliberate interference being caused to Amateur Radio communications.

...AND MORE FCC ENFORCEMENT ACTIONS RESULT
IN FINES FOR CB OPERATORS

Fines totalling \$900 were levied June 28, 1985, on Joseph Roberson of Philadelphia, Pennsylvania, for operation of his CB radio at a power level in excess of 4 watts. After numerous complaints from residents of a North Philadelphia neighborhood concerning interference to their television reception, an FCC engineer determined that the transmitter used by Roberson was overpowered. Attempts by the engineer to inspect the equipment were, and continue to be, refused.

Also in Philadelphia, Harry O. Jackson was fined \$750 on May 10, 1985, for unlawfully interfering with television reception over a period of half a year. His CB radio was calculated by the FCC to be transmitting with a power of 47 watts.

COMPUTER USER FINED FOR TELEVISION INTERFERENCE

On May 9, 1985, the U.S. Attorney for the Eastern District of Pennsylvania announced that a total of \$3000 in fines was sought in a suit was filed against Comp-Art, Inc., for unlawfully interfering with television reception in a South Philadelphia neighborhood over a period of 18 months.

An FCC engineer determined that a computer used by Comp-Art was causing the interference. Under FCC regulations the computer used by Comp-Art may not be used if it causes interference with television reception. Fines were levied on Comp-Art for failing to correct the problem and shield the computer to eliminate the interference.

VCR RFI WORRIES INDUSTRY

Serious RFI problems with VCRs -- RF pickup by the playback head because of poor shielding, plastic cases, etc., in the 500-700 kHz and 3.5 MHz ranges -- has industry worried. The concern is that prices of VCRs are expected to drop to as low as \$159 by Christmas ... making it likely that neighbors on all sides of a ham can afford a VCR.

TNX to "the ARRL Letter and K2JF"

* * * * * WHAT IS DX PART II * * * * *

If you remember in the "Hamfest" edition of Crosstalk, we said that the names of the "BIG GUNS & LITTLE PISTOLS" of the GCARC would be given to you for your information and help in starting DXing. The BIG GUNS (300 countries or more) are W2SUA "Shorty" N2SS, Tony, WA2VEE Bill, NJ2C Bud, K2OWE Jim; the Little Pistols (Under 300 countries are: WA2NPD Doug, K2HPV Herb, KD2CR Len, KE2M Tom, and K2JF John. Now if you contact any one of these fellows they will be glad to give you a helping hand in "shooting DX. "These fellows all have DXCC.

OK let us continue on a little bit in reference to getting started. If you are primarily a CW man the task is really not much to it. As mentioned before the 40 and 80 meter bands are wide open after the Sun sets, and at dawn. The Twenty meter band gets pretty good early in the AM (7:30 to about 8:30) for the JA's and Pacific areas; so come on and see how many JA's prefixes you can work; and you don't need a beam to do it. Yeah, I grant you it helps, but it is not necessary. OK on 40 the best suggestion I can give you is to look at a $\frac{1}{2}$ wave horizontal or a $\frac{1}{4}$ wave sloper. (I use a Sultronics trapped antenna SLOPER that works 40, 80 and 160. I do very little 160 but it works very well on 40 and 80 and it does not take up much room.) Don't forget the G5RV antenna. That baby works well on 80 thru 20. Rember outside of your Transmitting and Receiving equipment there are TWO very important devices you should have: (1) A LOW PASS FILTER and (2) a Transmatch for your antenna. The LOW PASS filter is a MUST; whereby the Tuner is a good idea to match your antenna to the various frequencies you are going to use. If you are going to run QRO you will need a power meter also, so you can monitor your Power Output not to exceed ;500 watts PEP.

Ok, now I have my equipment squared away, is there anything I can get to help me that will tell me what DX is around? The answer is YES. The Long Island DX Bulletin is one of the most important publications you can get. It cost you \$24.00 a year but it is an invaluable aid in shooting DX. A copy will be on the table for you to see (Please don't take - it some other fellow may want to see it before the night is over). There are some local DX listening frequencies. 144.400 is the SJRA DX call out, 144.930 is another call out frequency, and 147.270 is the

Frankford RC clubs call out frequency. Listen to these when some DX is around and here you can find out (1) What DX is hot; (2) Where it can be found (Band and Freq); and is it a Net or List operation or is the DX shooting "BUCKSHOT."

Hey wait a minute-what is this Net, List, and Buckshot type of operation? That is the next topic for another CROSSTALK article if you want it. Let me know if there is any interest in these type of articles. If any: we will cover UHF DX (this is right up the alley for the 6 meter to 1295 MHz people and there is plenty of it); RTTY DX, plenty of that around; and if more is wanted we will write of the finer parts of DX hunting, like the DX EDGE, Beam Heading run-offs, DX associations like the INDXA, and W7PHO etc. So if interested let me know.

C U in the "Plie-Ups".
73 K2JF

ARRL FILES NOVICE PETITION WITH FCC The ARRL Executive Committee May 18th proposal for enhanced Novice privileges was filed as a Petition for Rule Making with the FCC on June 6th. The ARRL Novice petition provides for: (1) 10 meter voice privileges (except double sideband AM) between 28.3-28.5 MHz and CW/digital 28.1 - 28.3 MHz. Full amateur (1000 watt PEP output) power to be authorized with Technicians automatically gaining enhanced Novice privileges. (2) Full amateur privileges in the 220 - 225 MHz band with 25 watt PEP output limit. (3) All voice, CW and data privileges between 1246 and 1260 MHz. Five watt PEP output limitation.

TNX W5YI Report/K2JF

Want to work French Polynesia FOØ? Well, if you do try and see if you can work either FOØGJ or FOØMB. This is the Island of "Tetiaroa" French Polynesia. Tetiaroa is located about 25 miles due north of Papeete, Tahiti, it belongs to an Amateur Radio Operator known as Marlon Brando the Movie actor. Since he owned the remote island he was on which he considers a separate country with himself as the licensing authority he gave himself the call FOØMB! It is understood he is active on the Ham bands.

TNX W5YI/K2JF

FCC MOVES TO REDUCE CABLE TV LEAKS: The FCC has amended its criteria for Cable TV signal leakage. Under the new rules passed June 21st, cable operators must begin filing annual and quarterly leakage reports with the FCC. Every cable system operator must also conduct quarterly system

checks measuring leakage from their cable system. (Seems to me that we may have one Cable Operator that needs to have the new amended criteria sent to him ! Right N2FJQ?)

TNX W5YI/K2JF

How many of you know Who ? What ? When ? and Where are WAMCATS ?

WILL A CORRESPONDING SECRETARY GO TO HEAVEN ?

If He writes a letter -- it's too long!
If He sends a postcard -- it's too short!
If He doesn't send a notice -- he's too lazy!
If He attends a committee meeting -- he is butting in!
If He stays away -- he is a shirker!
If He Duns a member for dues -- he is insulting!
If He fails to collect dues -- he is incompetent!
If He asks for advice -- he is incompetent!
If He doesn't -- he is bull-headed!
If He writes his reports complete -- they are too long!
If He condenses them -- they are incomplete!
If He talks on a subject -- he is trying to run things!
If He remains quiet -- he has lost interest in the meetings!

ASHES TO ASHES, DUST TO DUST, IF OTHERS WON'T DO IT,
THE CORRESPONDING SECRETARY MUST.
